APPLE SEEDLINGS

We have been in the Apple Seedling business for nearly sixty years and the extensive trade that we have is sufficient proof that our stock and grades are satisfactory to the trade. We will have our usual supply of seedlings to offer for shipment this season. They will be sprayed constantly during the growing season so as to produce a vigorous growth.

Our seedlings are grown in the rich, black soil of the Kaw Valley in Kansas. We have so much confidence in them that we feel safe in assuring customers that there will be no better grown in America. They will not be dug this Fall until they are thoroughly matured, as this is very essential for the best results.

Owing to the very thorough cultivation and care that we give them and the added expense of spraying, it costs more to grow our seedlings, but we feel that the healthy and strong growth is well worth the extra expense.

We grow, handle, and grade our seedlings right, which is worth something to the customer.

We can often give our customers the advantage of carload rates to various points over the country, which is quite a saving in freight charges.

FRUIT TREE STOCKS FRENCH GROWN

We wish to call attention to the fact that these goods are sold net at Shenandoah. We take all the risk of transportation and pay all charges from France to this place. This is a very important point for customers to remember.

Sometimes there is quite a loss in these long shipments, but this does not affect the customer, as we open the boxes and grade out the damaged seedlings and guarantee our stock to be in good condition when it is delivered to the forwarding agent at Shenandoah.

We are prepared, however, to quote prices on application f. o. b. cars Angers, France, and customer paying duties and charges to destination, also taking all risks. Or we will quote prices out of customs at New York and ship from there direct.

A government inspector is stationed at Shenandoah most of the winter and he inspects all imported stocks.
